OSAGIE HENRY IDEHEN

CYBERSECURITY ANALYST • TIER 1 SOC ANALYST • DETECTION ENGINEER

Lagos, Nigeria (WAT / UTC+1 • Available for 24/7 Shifts) | +234 912 769 5096 | henryosagieidehen@gmail.com | LinkedIn | GitHub: SOC-EDR-Detection-Lab

PROFESSIONAL SUMMARY

CompTIA Security+ certified Cybersecurity Analyst with proven hands-on experience in Security Operations Center (SOC) monitoring, Endpoint Detection & Response (EDR), SIEM log analysis, and incident triage. Demonstrated expertise in building detection pipelines, analyzing Sysmon kernel telemetry, simulating adversary tactics (MITRE ATT&CK), and authoring actionable incident triage reports. Strong background in identity security (Azure AD/Entra ID), vulnerability management, and network defense. Adept at operating in fast-paced environments, eliminating false positives, and collaborating across time zones (aligned with UK GMT, CET, and US business hours).

CERTIFICATIONS

- **CompTIA Security+ (ce)** – CompTIA (Valid through 2028)
- **AWS Certified Cloud Practitioner** – Amazon Web Services (AWS) (Valid through Oct 2028)
- **Certified in Cybersecurity (CC)** – Institute of Chartered IT Professionals (ICITP), 2025

TECHNICAL SKILLS

- **SIEM & EDR Platforms:** LimaCharlie Cloud EDR, Splunk Enterprise, Security Onion, Microsoft Sysmon (SwiftOnSecurity)
- **Threat Detection & Frameworks:** MITRE ATT&CK, NIST SP 800-61 Rev. 2, Cyber Kill Chain, Incident Triage, IoC Extraction
- **Network & Security Tooling:** Wireshark, Nmap, Qualys Vulnerability Management, TCP/IP, DNS, WLAN Architecture, NAC, VLANs
- **Cloud & Identity Security:** Microsoft Azure, AWS, Microsoft Entra ID (Azure AD), RBAC, Multi-Factor Authentication (MFA), Conditional Access
- **Operating Systems & Scripting:** Windows 10/11, Windows Server (Active Directory DS), Linux (Ubuntu, Kali), PowerShell, Bash
- **Standards & Governance:** NIST Cybersecurity Framework (CSF), ISO/IEC 27001, Access Control Models (Least Privilege)

TECHNICAL SECURITY PROJECTS

Cloud EDR Deployment & Adversary Detection Engineering Lab | GitHub Repository Link **Oct 2026**

- Architected an end-to-end endpoint detection pipeline utilizing Windows 11, Microsoft Sysmon (modular kernel logging config), and LimaCharlie Cloud EDR.
- Emulated adversary execution targeting system recovery mechanisms (**MITRE ATT&CK T1490: Inhibit System Recovery**) using Living-off-the-Land Binaries (LOLBAS – `vssadmin.exe`).
- Engineered and deployed custom YAML Detection & Response (D&R) rules to detect and alert on unauthorized shadow copy deletion attempts in real time.
- Authored a standard SOC Incident Triage Report detailing executive summary, timeline, parent-child process relationships, IoCs, and host containment procedures.

Phishing Analysis, Threat Intelligence & Incident Triage Lab | GitHub Project Link **Oct 2026**

- Conducted in-depth forensic investigation of an active credential harvesting phishing attack targeting Microsoft 365 enterprise user accounts (**MITRE ATT&CK T1566.002, T1036.005, T1539**).
- Parsed and unfolded RFC 822 MIME headers to trace unauthorized relay MTA hops and evaluated SPF, DKIM, and DMARC alignment failures caused by permissive policy settings.
- Engineered an automated PowerShell triage script to extract/defang URLs, uncover deceptive anchor text spoofing, and compute cryptographic file hashes (SHA-256).
- Authored custom YARA detection logic and formulated an incident containment playbook detailing Microsoft 365 tenant-wide search-and-purge and Entra ID session revocation.

Security Operations Center (SOC) Log Analysis & Alerting Simulation **2024**

- Deployed a simulated multi-tier SOC environment utilizing Splunk Enterprise, Security Onion, and Wireshark to ingest and analyze endpoint and network telemetry.
- Formulated custom Splunk Search Processing Language (SPL) queries and alert dashboards to identify brute-force authentication attacks, abnormal port activity, and lateral movement.
- Documented investigation workflows, distinguishing true-positive intrusions from benign administrative background noise.

Enterprise Identity & Access Management (IAM) Hardening | Mapelead Limited **2024**

- Enforced least-privilege access and Role-Based Access Control (RBAC) across Microsoft Azure AD / Entra ID.
- Configured Conditional Access Policies and Multi-Factor Authentication (MFA) using Security Defaults, actively monitoring sign-in logs and configuring alerts for anomalous administrator logins.

PROFESSIONAL EXPERIENCE

Security Operations Center (SOC) Analyst **Dec 2024 – Present**
Mapelead Limited *Lagos, Nigeria*

- Monitor 24/7 security event queues and network traffic to detect, triage, and respond to potential cyber threats, adhering to standard incident handling playbooks.
- Execute regular vulnerability assessments across enterprise endpoints and network segments using Qualys and Nmap; partner with systems engineering to track patching and remediation.
- Analyze alert telemetry to eliminate false positives and escalate verified true positives with detailed forensic artifacts (IoCs, timestamps, command-line arguments).
- Implemented multi-factor authentication (MFA) and least-privilege access controls across core services, mitigating unauthorized credential access risks.
- Coordinate incident escalation documentation and communicate technical impact to engineering and management stakeholders.

IT Analyst **Mar 2022 – Nov 2024**
Ford Mart Legacy Mart *Benin City, Nigeria*

- Managed enterprise systems administration, ensuring business continuity and maintaining 99.8% system availability across operational networks.
- Oversaw cross-platform system and data migrations, developing fallback protocols that minimized operational downtime.
- Conducted system hardening reviews and delivered cybersecurity hygiene and phishing awareness training for 40+ corporate staff.
- Authored Standard Operating Procedures (SOPs) and technical documentation to streamline onboarding and incident response.

Information Technology Specialist **Jan 2018 – Dec 2021**
BINCOM IT *Lagos, Nigeria*

- Administered and maintained physical hardware, enterprise operating systems, network switches, and peripheral infrastructure across multi-site teams.
- Resolved Tier 2 technical incidents within strict SLA windows, diagnosing network connectivity faults, permissions anomalies, and system errors.
- Developed and standardized IT technical documentation, hardware inventory tracking, and knowledge base guidelines.

Information Technology Intern **Jun 2016 – Dec 2016**
University of Benin *Benin City, Nigeria*

- Supported deployment and physical configuration of enterprise network hardware, including Cisco routers, switches, and access points.
- Conducted exploratory testing and evaluated emerging software applications to support campus information security initiatives.

EDUCATION

Bachelor of Science (B.Sc.) in Information Technology **2013 – 2018**
National Open University of Nigeria (NOUN) *Nigeria*
